

The **World Trade Center** is a partially completed complex of buildings, under construction, in Lower Manhattan, New York City, United States, replacing an earlier complex of seven buildings with the same name on the same site. The original World Trade Center featured landmark twin towers, which opened on April 4, 1973, and were destroyed in the September 11 attacks of 2001, along with 7 World Trade Center . The other buildings in the complex were severely damaged by the collapse of the twin towers, and their ruins were eventually demolished. The site is being rebuilt with six new skyscrapers, a memorial to those killed in the attacks, and a transportation. One World Trade Center, the tallest building in the United States, is the lead building for the new complex, reaching more than 100 stories upon its completion in November 2014.

The **Statue of Liberty** is a colossal neoclassical sculpture on Liberty Island in the middle of New York, harbour in Manhattan, New York City. The statue, designed by Frederic Auguste Bartholdi, a French sculptor and dedicated on October 28, 1886, was a gift to the United States from the people of France. The statue is of a robed female figure representing Libertas , the Roman goddess of freedom, who bears a torch and a *tabula ansata* upon which is inscribed the date of the **American Declaration, of Independence July 4, 1776**. A broken chain lies at her feet. The statue is an icon of freedom and of the United States: a welcoming signal to immigrants arriving from abroad.

In geometry, a **pentagon** is any five-sided polygon. A pentagon may be simple or self-intersecting. The sum of the internal angles in a Simple pentagon is 540° . A pentagram is an example of a self-intersecting pentagon.

The **Washington Monument** is an obelisk on the National Mall in Washington, DC, built to commemorate George Washington, once commander-in-chief of the early Continental Army and the first American president.

One World Trade Center (also known as **1 World Trade Center**, **One WTC** and **1 WTC**; the current building was dubbed "**Freedom Tower**" during initial base work) presently refers to

the main building of the new World Trade Center complex in Lower Manhattan, New York City, and is the tallest skyscraper in the Western Hemisphere¹ and the fourth-tallest in the world. The 104-story super tall structure shares a numeric name with the northern Twin Tower in the original World Trade Center that was destroyed in the terrorist attacks of September 11, 2001.

The **White House** is the official residence and principal workplace of the president, located at 1600 Pennsylvania Avenue NW in Washington, D.C. It has been the residence of every U.S. president since John Adams in 1800. The house was designed by Irish-born James Hoban and built between 1792 and 1800 of white-painted Aquia Creek sandstone in the Neoclassical style.
